EN 1149-5:2018

ELECTROSTATIC DISCHARGE IF PROPERLY GROUNDED

Norm: **EN 1149-5:2018**

Provides electrostatic protection for coveralls to prevent the build-up of static electricity that could otherwise cause electrostatic discharge (ESD) or sparks that may ignite flammable gases, vapors, or dust.

**EN 14325:
2004**

PERFORMANCE CLASSIFICATION FOR CHEMICAL PROTECTIVE CLOTHING MATERIALS

Norm: EN 14325 : 2004

Ensures that the fabrics and seams used in coveralls and related garments meet rigorous standards for mechanical strength and chemical resistance.

DTS PROTECT[®]

FLAME RETARDANT COVERALL TYPE 5/6

DTS Flame Retardant Coveralls are designed to reduce the risk of injury caused by brief contact with flames or heat.

GENERAL FEATURES:

- **Thicker and stronger 65 GSM fabric**
- Breathable, lightweight and flexible material for exceptional wearer comfort
- Particle-tight and spray-light
- Free of paint wetting impairment and silicone

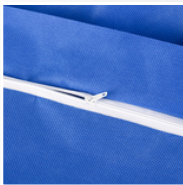

COMFORT FEATURES:

- Skin-friendly nonwoven material inside
- Elasticated waistband for optimal fit
- Secure and convenient closures thanks to elasticated bands on hood, arms and legs
- Thumb loop for enhanced fit
- Inner sewn elasticated waist, wrist, hood and ankles

DATASHEET

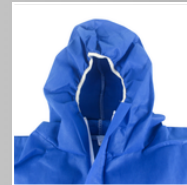

FLAME RETARDANT
COVERALL
TYPE 5/6

Self-adhesive zipper flap for optimal protection.

Elasticated waistband for a customised fit.

Elasticated hood.

PROTECTION FEATURES:

- Self-adhesive zipper flap for optimal protection
- Anti-static properties
- Protection against infectious diseases
- Protection against flame - limited flame spread materials, materials assemblies and clothing
